Pro Brassfoundry

Bottle Air Vent

For use with heating and air conditioning systems to continually remove air from system without manual adjustment. Maximum working pressure 10 bar. Temperature range 0-110 degree C. Must be installed vertically.

702911

Code	SIZE/DESCRIPTION	BOX QTY	PRICE EACH
702911	15mm Brass	1	£8.38

Auto By-Pass Valve

Building regulations part L demand that an automatic by-pass is fitted to all new and existing dwelling installations where boiler and/or hot water system replacements are carried out. The bypass valve is designed to prevent the pump from working against a closed circuit when thermostatic or motorised valves close during the normal operating cycle of the system. The valve allows adequate flow to be maintained on the return to the boiler and reduces excessive pressure across TRV's. Working pressure 10 bar max./ working temperature 100 degree C max. Capacity 1-5m³/hr. Range 0.1 bar - 0.5 bar differential pressure.

755102

Code	SIZE/DESCRIPTION	BOX QTY	PRICE EACH
755102	22mm Straight	1	£13.94

Pressure Reducing Valve

Installed in water systems to reduce and stabilise inlet pressures from mains water or boosted water supplies. Designed for hot and cold water services and can be used to prevent excessive pressure at water outlets such as taps and showers. Maximum pressure at inlet 12 bar, outlet adjustment range 1- 6 bar. Factory setting 3 bar Max. working temperature 65 degree C. Pressure gauge reading 0-10 bar. Body manufactured from DZR brass.

702939

Code	SIZE/DESCRIPTION	BOX QTY	PRICE EACH
702939	22mm-15mm supplied complete with gauge. Adjustable between 1 - 6 bar	1/5	£33.86

Radiator Valve

Supplied with Lockshield & Wheelhead. Chrome plated.

702942

702941

702942	15mm Angled	10/60	£3.86

Radiator Valve with Drain off

Supplied with Lockshield. Chrome plated.

702945

702944

702943

Code	SIZE/DESCRIPTION	BOX QTY	PRICE EACH
702943	8mm Angled	10/60	£6.60
702944	10mm Angled	10/60	£6.60
702945	15mm Angled	10/60	£6.60

The Pro Classic TRV allows variable temperature and flexibility to control the performance of the radiator. The valve can be mounted vertically or horizontally at either end of the radiator. To work correctly the Pro Classic must be installed on a 2 pipe heating system with a free flow (not draughts) of air around the sensor head to ensure optimum performance. An automatic differential bypass valve (product code 702909) must be fitted as part of the TRV installation. Maximum pressure 10 bar. Maximum pressure differential 1 bar. Maximum water temperature 100 degree C. Frost setting 7 degree C. Temperature adjustment range from 0 - 28 degree C. Manufactured from brass with chrome plated finish. Complies with BS EN215.
